To Whom It May Concern,

Subject: 2025 Pipeline Activity

Trans-Northern Pipelines Inc. (TNPI) operates a pipeline linking the Montreal, Ottawa, and Toronto regions that carries the fuel we use every day – such as gasoline, diesel, jet fuel, and heating fuel (refined petroleum products). We are committed to operating in a safe and environmentally responsible manner to protect the public, the environment, and the pipeline.

We are seeking Council approval for an exemption from the current noise by-law restrictions to allow for 24/7 operation/construction on or around the dates noted below. The work will consist of cleaning and purging of the 10-inch pipeline from Bowmanville to Oakville. All work will take place within our facility located at 3021 Providence Rd Clarington, ON (Bowmanville Station). The expected noise-decibel level is approximately 100db, dropping to 80db 40.0 meters from the source location. The closest residence has been identified at 170.0 meters from our work location. Between the work location and the nearest residence is a large forest which will also assist in reducing the decibel level at the residence. Prior to the start of the work, all residents within 300.0 meters will be notified.

July 7th - July 15th – one (1) to two (2) days (expectation is one 24-hour working period, max. two)

July 20th – Aug 8th – one (1) to three (3) days (expectation is one 24-hour working period, max. three)

If you have any questions or concerns about this upcoming activity, please do not hesitate to contact me at any time.

Yours truly,

Taylor LeBlanc
